Flexible Packaging  
& Label Solutions

## 1 About us

The LabelProfi team has years of experience in the fields of graphics and production printing. We started off as a small graphic design and prepress studio in 1994, always trying our best to offer our clients the most up-to-date technologies on the market. We are also known for our comprehensive customer support services and maximum flexibility, which have become hallmarks of LabelProfi.

In the last few years, we have specialized in the field of label production.

We invested years of experience and know-how into the LabelProfi trademark, which has become a synonym for high quality small and medium runs digital labels and flexible packaging.

Label production was expanded at the end of 2019 with the production of flexible packaging, which is now considered as one of the fastest growing packaging industry sector, with extremely high added value.

**Our mission** We always try to nurture long-term business relations with our partners. **Innovative solutions, flexibility, excellent customer support and the use of cutting-edge technology** are a must in our company. They serve as a foundation for high quality label and flexible packaging products and services with high added value and competitive prices.

In accordance with our long-term vision, we strive to implement sustainable approaches and practices into our production and business processes, making us one of our branch's leading companies in this respect.

**Our values** We encourage our employees to have **a positive attitude towards work, creativity, innovation, and care for the servicing of our customers' needs and wishes.** Relations between workers are relaxed, creative, tolerant, and straightforward. We resolve problems quickly and efficiently, without resorting to unnecessary panic. In professional, as well as personal terms, we provide for

sufficient education and qualification of our employees. We try to promote an eco-friendly and sustainable approach to doing business at all levels. Our corporate culture is founded on fair commercial practices and fulfillment of all agreements.

**Our vision** We hope to become the **leading supplier of small and medium run labels and flexible packaging** in Central and West European markets. We are widely known on the targeted markets for our excellent services, flexibility, reliability, and our positive attitude towards the environment. We maintain and increase our competitiveness through constant innovation of our processes and development of new products and services.

Our way of doing business is validated by numerous quality and environmental certificates.

## What we do - Labels and flexible packaging

### High quality LABELS for various different branches and fields

At LabelProfi we offer labels for different branches and fields of application. We guarantee the highest print quality with a wide range of converting options. In addition to reliable and excellent customer service, we also guarantee our customers competitive prices.

#### Advantages of our labels:

- many paper any synthetic label substrates
- supreme digital printing quality
- label finishing: varnishing, lamination, cold or hot foil printing, screen printing, embossing, die cutting, rewinding and sheet cutting
- primary packaging

### FLEXIBLE PACKAGING for more functional packaging solutions

We produce digitally printed films from a wide variety of materials, suitable for packaging different aggregate states, adaptable to many shapes, sizes and opening methods. With the latest digital technology, we can guarantee an extremely short time of production, printing small runs and the ability to print variable data and personalized content.

#### Advantages of our flexible packaging:

- many flexible packaging applications (bags, sacks, sachets, pouches, wrappers, etc.)
- variety of re-closure and dispensing options
- light-weight and easy to open, carry, store, and reseal
- indicates and maintain freshness, extending the shelf life of many products, especially food

# 3 Technology and know-how

The general trajectory of our company – digital printing of high quality roll labels and flexible packaging – dictates our technological development, as well. With a bold, but deliberate investment strategy, we have reached a point, where we can confidently claim to possess the best printing and finishing technology on the Slovenian market, at least in the context of digital label and flexible packaging production.

## LABELS

The vast majority of our production relies on digital roll-to-roll printing technology. For these purposes, we use high-performance press with capacity around 3,000 – 5,000 m<sup>2</sup> of printed labels per shift. HP Indigo WS6800 is considered to be the absolute technological peak in our branch, enabling the highest label printing quality.

### The most important benefits of labels digital printing:

- supreme printing quality
- flexibility of production (frequent design changes)
- various designs within one label size (possibility of cost reduction through quantitative pooling)
- variable data printing
- high responsiveness - fast deliveries
- small or medium runs of different types of labels
- sample runs for later large-scale production
- eco-friendly label production

# 3 Technology and know-how

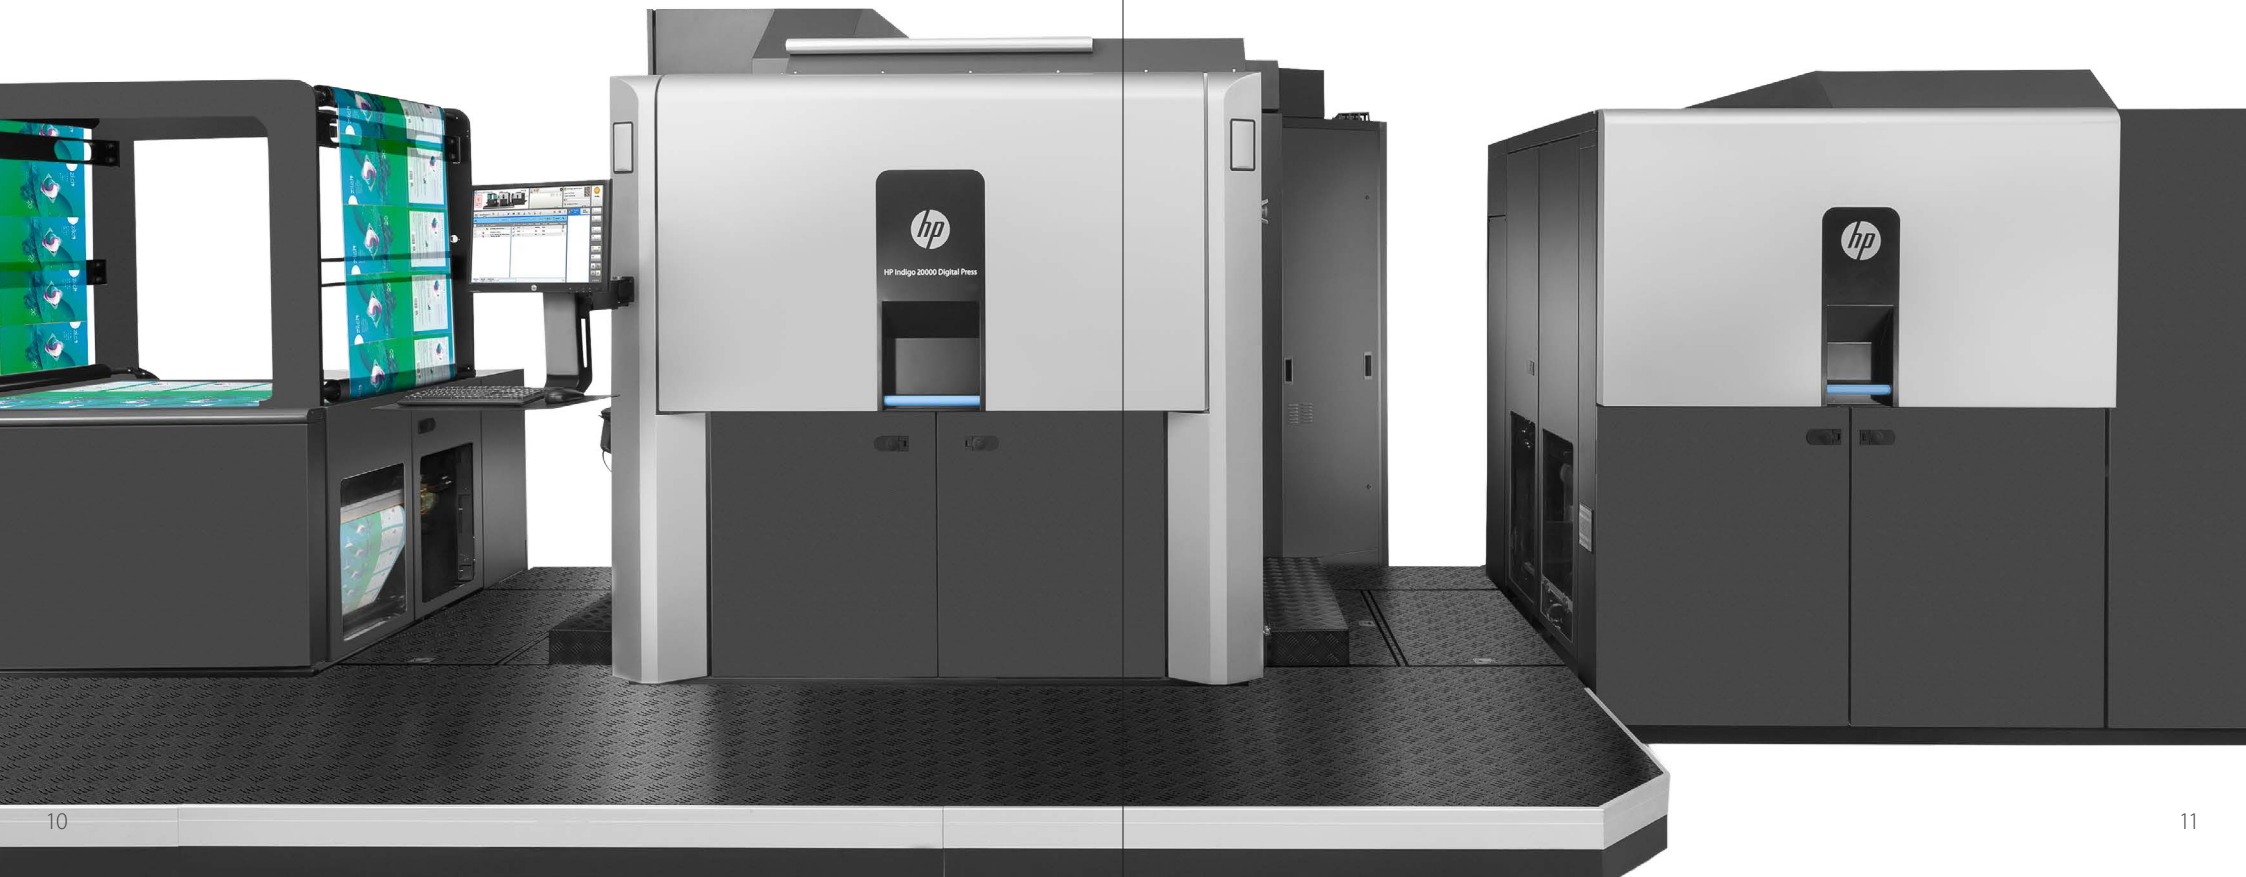

## FLEXIBLE PACKAGING

At the implementation of flexible packaging in 2019, we rely our packaging production on the latest technological equipment based on digital printing technology.

HP Indigo 20000 digital printing technology is considered one of the most sustainable, currently available on the market. It is a completely closed system of ink in cartridges, which do not require the addition of hazardous chemicals or solvents (Voc free), thus reducing the potential risk to the environment.

### The most important benefits of flexible packaging digital printing:

- personalization
- printing variable data
- short production time
- wide range of products
- ecological and sustainable solutions

# 6 Certificates and standards of quality

LabelProfi is known for maintaining high standards throughout its production processes, for which we have acquired various certificates of quality. We have placed special emphasis on sustainability, environmental and health standards, using certified (FDA Foods Standards, ROHS, REACH) 100 % eco-friendly inks.

We are also very careful about dealing with waste and consumable materials, hence keeping the carbon footprint of our products as low as possible. We have confirmed our internal system organization, consistent systematization, responsibility to the environment and traceability in all phases of business processes by receiving ISO 9001 and ISO 14001 quality certificates, to which we are very proud of.

However, it is not only the natural environment we are trying to uphold through good business practices. We are equally concerned about the societal dimensions of business, which is why we always strive to do as much as possible for our employees and our partners. Business ethics – the fulfillment of financial, legal and moral obligations to our employees, business partners and state authorities – is very important to us.

In the beginning of 2020, our company acquired another very important **BRC Packaging technical standard, version 6**, with the highest A grade for digital printing, lacquering, laminating, hot-foil printing, screen printing, embossing and slitting of paper and plastics for self-adhesive labels on rolls for secondary and technical application; digital printing, thermal laminating and slitting of flexible packaging laminates and films for food contact.

The company respects and meets all the requirements of the BRC Packaging standard and is committed to the highest quality and safety of our products.

With the new version 6, the BRC Packaging standard provides a solid framework that helps produce safe packaging products and manages product quality so that packaging manufacturers meet customer requirements while maintaining product compliance and consumer safety. The emphasis of the requirements of the standard is on the commitment to management and the safety program based on risk analysis and the quality management support system. Finally, the standard promotes greater transparency and traceability of the supply chain in the food industry.

The BRC Packaging v6 certification is recognized by many brand owners, retailers, and food manufacturers who evaluate the performance of their suppliers.

# 7 Ecology and sustainability

## Forests are the lungs of our planet - LabelProfi obtained the FSC® Chain of Custody (FSC® CoC) certificate

At LabelProfi we are aware that only by working together for sustainable forest management, we will be able to maintain forest biotic balance and leave it to future generations. When we have obtained the FSC® certificate, we showed our commitment to nature and forests, which we are very proud of.

LabelProfi obtained the FSC® Chain of Custody (FSC® CoC) certificate for the production of adhesive labels, certified Mix and FSC® Recycled.

A conscious buyer wants to buy a product with enough evidence (FSC® certification) that the basic material (wood, wood product, paper or paper product) was obtained in a sustainable and responsible way.

FSC® is an independent, non-profit, non-governmental organization that established the first forest management system, namely confirmed the traceability of certified wood or products FSC® - CoC (trust chain).

In its business operations, LabelProfi tries to keep up with the contemporary progress in the field of sustainable development by implementing fresh and exciting new ideas to our production process. We have already adjusted our label and packaging production to include printing technologies using 100% eco-friendly inks, as well as minimal loss of waste and consumables, thereby lowering the carbon footprint of our products

We try to ration resource consumption on a daily basis by optimizing all of our business processes, from planning to logistics. In this respect, we are doing our very best to keep up with the global trends of reducing the carbon footprint and consumption of material resources.

We are not indifferent to our planet's future and choose to be socially responsible.
